PROFESSIONAL SUMMARY

Full Stack Developer fresher (B.Tech Computer Science - AI, 2026) with a strong backend focus in Python, Flask, Django, and FastAPI, building REST APIs, relational database schemas, and scalable server-side architectures. Hands-on experience integrating AI/LLM systems (RAG, LangGraph) into backend services, plus responsive front-end interfaces (HTML, CSS, JavaScript, Bootstrap). Backed by three internships across data engineering, ML, and analytics, with solid grounding in SQL, ETL pipelines, Git/GitHub, and Agile workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend Development: Flask, Django, FastAPI, REST API Development, OOP, Express.js, JWT, OAuth

Databases: MySQL, PostgreSQL, Relational Database Design

AI/LLM Engineering: LangChain, LangGraph, RAG Pipelines, Hugging Face, Ollama, Groq API, Whisper STT, Piper TTS, TensorFlow, Scikit-learn, OpenCV, YOLO

Front-End: React.js (fundamentals), HTML, CSS, JavaScript, Bootstrap, Responsive Web Design

Tools & Practices: GitHub, VS Code, Postman, Jupyter Notebook, Google Colab, Power BI

PROJECTS

AI-First CRM | *Python, FastAPI, PostgreSQL, LangGraph, RAG / Context Retrieval*

- Architected an AI-first CRM backend with FastAPI and PostgreSQL, exposing REST APIs for lead, contact, and pipeline management.
- Designed a LangGraph-based agentic workflow to orchestrate multi-step AI reasoning across CRM operations, including data retrieval, summarization, and follow-up generation.
- Implemented RAG-based context retrieval to ground AI responses in customer/knowledge-base data, improving the relevance of AI-suggested actions.
- Built and integrated multiple AI-powered functions (lead scoring, email drafting, meeting summarization) directly into the backend service layer.

AI Voice Sales Agent | *Python, LLM, Speech-to-Text (Whisper), Text-to-Speech (Piper)*

- Built an end-to-end AI voice sales agent combining Speech-to-Text (Whisper), LLM-based conversational reasoning, and Text-to-Speech (Piper) to automate sales calls.
- Implemented lead qualification logic and AI-generated call summaries, and integrated the agent with a CRM/database layer to persist call outcomes and lead status.

INET: Cognitive Image Segmentation | *Python, Flask, TensorFlow, OpenCV, NumPy, Pandas, HTML, CSS, JavaScript, Bootstrap*

- Built and deployed a Flask-based backend that accepts dermoscopic skin image uploads and returns AI-driven segmentation results through a REST endpoint.
- Handled dataset preprocessing, model integration, and backend-to-frontend data flow end-to-end, with a responsive UI for displaying predictions.

Multi-Object Tracking System | *Python, Flask, YOLO, OpenCV, TensorFlow, NumPy, Pandas, HTML, CSS, JavaScript, Bootstrap*

- Built a Flask backend with API endpoints that streams real-time object detection/tracking results using YOLO, processing live video frames via OpenCV and visualizing them on a Bootstrap dashboard.

INTERNSHIP EXPERIENCE

Data Science & Analytics Intern — Proxenix

May 2025 - Jul 2025

- Applied data preprocessing and feature engineering techniques in Python to improve dataset quality and model performance.
- Performed data cleaning, EDA, and dashboard reporting using Python and Excel to support business decision-making.

Data Engineering & Visualization Intern — HCL Tech

Oct 2024 - Mar 2025

- Executed EDA, cleaned datasets, and built SQL-based ETL pipelines for downstream reporting.
- Created interactive Power BI and Tableau dashboards and automated recurring data workflows, reducing manual reporting time.

Machine Learning Intern — Acmegrade Pvt. Ltd.

May 2024 - Jul 2024

- Developed machine learning models in Python (Pandas, Scikit-learn) for classification and prediction tasks.
- Improved model accuracy through feature engineering, preprocessing, and systematic performance evaluation.

EDUCATION

B.Tech, Computer Science (AI) — Bansal Institute of Engineering and Technology, Lucknow (UP) 2023 - 2026

Aggregate CGPA: 8.2

Diploma — Government Girls Polytechnic, Meja, Prayagraj (UP)

2020 - 2023

CERTIFICATIONS

- Joy of Computing using Python — NPTEL
- Data Analysis with Python, SQL & Relational Databases — IBM
- Technology Job Simulation & Data Analytics Job Simulation — Deloitte Australia (Forage)
- Data Visualization: Empowering Business with Effective Insights — Tata (Forage)
- Cyber Warrior Program — Quick Heal Foundation
